

*Creating ecological solutions through innovative engineering*

## **Environmental Field Scientist**

Wildlands Engineering, Inc. is seeking motivated individuals to join our growing North Carolina Team in our Charlotte and Raleigh offices. We are looking for environmental scientists with a background in habitat restoration, wetland delineation, field assessment, invasive species management, GIS, and/or environmental permitting. The preferred candidate should have 1-5 years of experience and understand the ecologic and hydrologic processes important to ecosystem restoration in the Southeastern United States. Duties will include performing stream assessments, geomorphic monitoring surveys, wetland delineations, vegetation surveys, and invasive species management. Ability to deal with long, hard field days is necessary, along with some overnight travel. Experience with surveying equipment, GIS, field monitoring protocols, wetland delineation, report writing, invasive species management, and interfacing with permitting agencies is preferred.

**PLEASE SEND RESUME AND COVER LETTER BY December 7, 2018 TO:**

Wildlands Engineering- Environmental Scientist, 1430 S. Mint Street, Suite 104, Charlotte, NC 28203  
resumes@wildlandseng.com, fax: 704-332-3306

The cover letter should identify preferred office location (Charlotte, Raleigh, or either), your area of study, any relevant software or previous work experience, why you are interested in this position, your approximate available start date, and any other information that you feel is important. Please be prepared to provide contact information for 2 references, if requested.

### **Company Information**

Wildlands Engineering, Inc. was founded in 2007 and focuses on stream and wetland restoration, watershed planning and assessment, and water quality management. With offices in North Carolina, South Carolina, and Virginia, Wildlands Engineering provides water resources engineering, ecosystem restoration, mitigation banking, and consulting services to an array of clients, including local and state government and conservation organizations. Our dedicated, motivated, and highly-trained team has experience in all aspects of stream and wetland restoration, watershed planning and assessment, and water quality management. Wildlands Engineering is committed to a watershed and ecosystem approach to ecological restoration and water quality management, and we provide exceptional services to our clients in an uncompromisingly ethical, innovative, and time-sensitive manner.

*Wildlands Engineering, Inc. is an equal opportunity employer and maintains a drug-free workplace.*
