

Creating ecological solutions through innovative engineering.

Environmental Designer / Water Resources Engineer

Wildlands Engineering is seeking a dynamic environmental designer or water resources engineer to join our growing company in our Charleston, SC office. In this role, the individual will support watershed planning and the design and implementation of water quality improvement and ecosystem restoration projects. The ideal candidate will demonstrate a minimum of three years of progressive experience in the field of water resources engineering. Engineering certification (EIT) or licensure (PE) is required. A graduate degree in a related field is preferred. Experience with AutoCAD Civil 3D, hydraulic and hydrologic modeling and construction document preparation is required. Prior experience with stormwater design and construction administration are preferred. This position will require occasional overnight travel and frequent outdoor activities.

Please submit resume and a cover letter by **February 28, 2019** to resumes@wildlandseng.com and include "Wildlands Engineering – CHS Engineer" in the subject line of the email. A cover letter is required and should identify relevant experience, why you are interested in this position, your approximate available start date, and the reason Wildlands should shortlist the applicant for an interview. Please be prepared to provide contact information for at least two references, if requested.

Company Information

Wildlands Engineering, Inc. was founded in 2007 as a firm focused on environmental restoration of the southeast United States. With offices in North Carolina, South Carolina, and Virginia, Wildlands Engineering provides water resources engineering, ecosystem restoration, mitigation banking, and consulting services to clients such as local and state government, developers, and conservation organizations. Our dedicated, motivated, and highly-trained team members possess a combined 452 years of experience in all aspects of stream and wetland restoration, watershed planning and assessment, and water quality management. We blend our technical expertise with our knowledge of the regulatory environment to offer solutions that bridge the gap between environmental needs and economic realities. Wildlands Engineering is committed to a watershed and ecosystem approach to ecological restoration and water quality management, and we provide exceptional services to our clients in an uncompromisingly ethical, innovative, and time-sensitive manner.

Major services provided include:

- Stream, Wetland, and Habitat Mitigation
- Stream and Wetland Restoration
- Water Quality Management and Mitigation
- Watershed and Environmental Planning
- Stormwater Management

Wildlands Engineering, Inc. is an equal opportunity employer and maintains a drug-free workplace.
