

Creating ecological solutions through innovative engineering

Adaptive Management Specialist

Wildlands Engineering, Inc. is seeking a motivated individual to join the growing team in our Charlotte, NC office. We are looking for an individual to help develop, coordinate, and implement land management activities for a variety of stream, wetland, and buffer restoration sites. Land management activities involve the ongoing maintenance and upkeep of project sites necessary to support project success and ecological health. This work includes invasive species management, supplemental planting and seeding, erosion management, maintenance of easement boundary infrastructure, property owner coordination, and wildlife management. This position will be responsible for identifying issues on sites, developing management activities, and driving implementation. The Adaptive Management Specialist's role will involve both hands-on work and coordination with sub-contractors.

The successful candidate should have at least 2-3 years of experience related to the job duties and understand the ecological processes important to riparian restoration in the Southeastern United States. Specific knowledge of invasive plant management and stream restoration practices is preferred. Ability to deal with long, hard field days is necessary along with some overnight travel. Proficiency in GIS, field monitoring practices, plant ID, technical writing, and interfacing with permitting agencies and landowners is additionally preferred.

PLEASE SEND RESUME AND COVER LETTER BY April 19, 2019 TO:

Email (*preferred method*): resumes@wildlandseng.com; subject line: Land Management

Fax: (704) 332-3306

Mailing Address: Wildlands Engineering, 1430 S. Mint Street, Suite 104, Charlotte, NC 28203

The cover letter should identify your area of study, any relevant software or previous work experience, why you are interested in this position, your approximate available start date, and any other information that you feel is important. Please be prepared to provide contact information for two references, if requested.

Company Information

Wildlands Engineering, Inc. was founded in 2007 and focuses on stream and wetland restoration, watershed planning and assessment, and water quality management. With offices in North Carolina, South Carolina, and Virginia, Wildlands Engineering provides water resources engineering, ecosystem restoration, mitigation banking, and consulting services to an array of clients, including local and state government and conservation organizations. Our dedicated, motivated, and highly-trained team has experience in all aspects of stream and wetland restoration, watershed planning and assessment, and water quality management. Wildlands Engineering is committed to a watershed and ecosystem approach to ecological restoration and water quality management, and we provide exceptional services to our clients in an uncompromisingly ethical, innovative, and time-sensitive manner.

Wildlands Engineering, Inc. is an equal opportunity employer and maintains a drug-free workplace.
