

Creating ecological solutions through innovative engineering

GIS Technician

Wildlands Engineering, Inc. is seeking a motivated individual to join the growing team in our Charlotte, NC office. We are looking for an individual to help with GIS tasks related to producing maps and technical reports at all stages of project development for a variety of stream, wetland, and other restoration sites. This full-time position supports other GIS team members and works collaboratively across other teams within the company. The preferred candidate will have a minimum of one (1) year of experience using ESRI ArcGIS products, good organizational skills, and a passion for improving ecosystems and water quality.

Company Information

Wildlands Engineering, Inc. was founded in 2007 and focuses on stream and wetland restoration, watershed planning and assessment, and water quality management. With offices in North Carolina, South Carolina, and Virginia, Wildlands Engineering provides water resources engineering, ecosystem restoration, mitigation banking, and consulting services to an array of clients, including local and state government and conservation organizations. Our dedicated, motivated, and highly trained team has experience in all aspects of stream and wetland restoration, watershed planning and assessment, and water quality management. Wildlands Engineering is committed to a watershed and ecosystem approach to ecological restoration and water quality management, and we provide exceptional services to our clients in an uncompromisingly ethical, innovative, and time-sensitive manner.

Job Description

Key Responsibilities

- Produce well-designed maps upon request for various teams with thoughtful composition and attention to detail
- Work in collaboration with team members to advance projects through all phases of development, interpreting and adapting to changing mapping needs as a project develops
