Wildlands Engineering, Inc. acquires Confluence Engineering, PC

Charlotte, North Carolina; July 2015 – Wildlands Engineering, Inc., an innovative ecological restoration firm headquartered in Charlotte, NC, is pleased to announce their recent merger with Confluence Engineering, PC, an Asheville-based company that specializes in ecosystem restoration, stormwater, and floodplain management. Wildlands Engineering will be the surviving entity in the merger.

“Merging with Confluence Engineering is a natural fit for us. Wildlands and Confluence have very similar approaches and guiding principles for ecological restoration and our cultures match exceptionally well,” states Shawn Wilkerson, president of Wildlands Engineering. The merger with Confluence Engineering will further strengthen Wildlands Engineering’s presence and service offerings of ecosystem restoration, mitigation solutions, watershed planning, and water quality management within the southeastern and mid-Atlantic United States.

Andrew Bick, former president of Confluence Engineering, will remain in Asheville, NC, and take on the role of Wildlands Engineering’s Asheville Team Leader. “We’re excited to bring our broad skill set to the table as we join forces with such a diverse and talented team,” states Andrew Bick. “Leveraging our combined engineering and science expertise will allow us to serve an expanding client base in the Southern Appalachian region.”
