

Creating ecological solutions through innovative engineering

Stewardship Associate

Wildlands Engineering, Inc. is seeking a motivated individual to join the growing team in our Charlotte, NC office. The Stewardship Associate will work to develop, coordinate, and implement land management activities for a variety of stream, wetland, and other restoration sites. Land management activities involve promoting the long-term ecological health of project sites necessary to support project success and ecological design. Work relates to native plant community enhancement, invasive species management, stream stabilization, conservation easement compliance, landowner relations, and wildlife management. The Stewardship Associate will both lead land management efforts on assigned restoration sites and assist other stewardship staff members on other sites. Work will also occasionally involve addressing infrastructure and general maintenance issues on sites.

The Stewardship Associate position is responsible for identifying land management issues on sites, developing management plans, and driving implementation. The Stewardship Associate's role will involve both hands-on work and coordination with sub-contractors. The Stewardship Associate will also be responsible for monitoring and documenting current conditions on sites and working collaboratively across restoration project teams. This position will additionally involve working with Wildlands' monitoring team to assess existing conditions and various success criteria on restoration sites. Success in this role will require attention to detail, adaptability, strong communication skills, and problem solving in addition to a firm background in ecology and land management techniques.

Company Information

Wildlands Engineering, Inc. was founded in 2007 and focuses on stream and wetland restoration, watershed planning and assessment, and water quality management. With offices in North Carolina, South Carolina, and Virginia. Wildlands Engineering provides water resources engineering, ecosystem restoration, mitigation banking, and consulting services to an array of clients, including local and state government and conservation organizations. Our dedicated, motivated, and highly trained team has experience in all aspects of stream and wetland restoration, watershed planning and assessment, and water quality management. Wildlands Engineering is committed to a watershed and ecosystem approach to ecological restoration and water quality management, and we provide exceptional services to our clients in an uncompromisingly ethical, innovative, and time-sensitive manner.

Job Description

Key Responsibilities

- Promote the long-term ecological health of project sites necessary to support project success
