

Creating ecological solutions through innovative engineering

Project Manager / Water Resources Engineer

Wildlands Engineering is seeking a dynamic individual to join our Charleston, South Carolina office as a project manager. We are looking for a water resources engineer with a multi-disciplinary stormwater or ecological restoration background. Areas of previous experience should include an understanding of stream and wetland design, stormwater management, hydrologic/hydraulic modeling, construction document production, construction management, and project management. This position will involve managing projects related to stormwater and ecosystem restoration assessment, design, permitting, construction, and post-construction monitoring. Projects may include design of streams, wetlands, and watershed improvements; hydrologic and hydraulic models; watershed planning; and/or new and retrofit stormwater best management practices (BMPs).

Company Information

Wildlands Engineering, Inc. was founded in 2007 and focuses on stream and wetland restoration, watershed planning and assessment, and water quality management. With offices in North Carolina, South Carolina, and Virginia, Wildlands Engineering provides water resources engineering, ecosystem restoration, mitigation banking, and consulting services to an array of clients, including local and state government and conservation organizations. Our dedicated, motivated, and highly trained team has experience in all aspects of stream and wetland restoration, watershed planning and assessment, and water quality management. Wildlands Engineering is committed to an environmentally sensitive approach to project development and implementation, with a focus on environmental improvement. We are committed to providing exceptional services to our clients in an uncompromisingly ethical, innovative, and time-sensitive manner.

Job Description

Key Responsibilities

- Manage technical design, budget, and schedule of complex ecological and water resource-based projects.
- Oversee successful implementation of projects through design, permitting and construction.
- Effectively communicate and coordinate with team members, clients, and stakeholders.
- Meet multiple deadlines with a willingness to react positively to changes in priorities.

Qualifications

- 4 to 20 years of progressive experience working with the ecological and stormwater related projects in the Southeastern United States.
- Undergraduate degree in an applicable field of engineering is required.
- Licensed Professional Engineer (PE) in South Carolina or the ability to obtain licensure by reciprocity is required.
- Experience with AutoCAD Civil 3D preferred.
- Experience with hydraulic, hydrologic, and/or watershed modeling is required.
- Experience preparing technical reports, construction plans and technical specifications, construction cost estimates, and construction administration.
- Must have valid driver's license.

PLEASE SEND RESUME AND COVER LETTER TO:

Email (*preferred method*): resumes@wildlandseng.com; subject line: Project Manager/Water Resources Engineer

Fax: (704) 332-3306

Mailing Address: 1430 S. Mint Street, Suite 104, Charlotte, NC 28203

The cover letter should identify your previous work experience, why you are interested in this position, your approximate available start date, and any other information that you feel is important. Please be prepared to provide contact information for two references, if requested.
